

# PRINTABLE RING SIZING GUIDE

## INSTRUCTIONS:

1. Print this sheet out on standard size printer paper. (You will get inaccurate results if you resize this or print on non-standard printer paper.)
2. Cut out the holes that are most likely to fit your intended finger; and find the hole that gives you the best fit. (Your finger should touch on all sides, but it shouldn't be so tight that the paper rips.)

**NOTE:** You can also use an existing ring (that fits the intended finger) by finding the hole that matches the inside of the ring best.
